Dear Partner,

It is with great excitement that I'm sharing with you the news of our rebrand from T3Media to Wazee Digital™. This change comes at an important time in our company's growth and is a strong representation of the success of our technology investments.

So why Wazee Digital? As a Denver-based company, we have a vested interest in our technology community. Denver has seen an explosion of growth over the past years, and there is no end in sight. Lower Downtown has emerged as the tech hub for innovation, and we wanted to pay tribute to our roots by acknowledging our hometown heritage. That heartbeat of innovation and technology advancement is what drives us to be better each day.

Eleven years ago, Wazee Digital was founded by technology innovators who had a vision for the media and entertainment space. We knew, even then, that the power of digital media could open doors for our customers in ways they could only imagine. Over the past decade, we have earned your business and trust by providing secure and reliable solutions and services powered by our platform, now called Wazee Digital Core (formerly Library Manager). We understand what most companies don't: that streamlining today's complex content management and distribution processes are essential to success in an ever-fragmented supply chain. We've built our business, technology, and customer success around a belief that by simplifying the digital media supply chain, we empower our customers to focus on what they do best – create and distribute powerful content.

In the coming weeks you will see and hear more public announcements surrounding our new name, but as our valued partner it was important to share this with you first. I look forward to celebrating this evolution in our company's growth with you in the coming months.

Harris Morris  
Chief Executive Officer  
Wazee Digital

Dear Sirs - sexist Dear Ladies and Gentlemen - seems too formal and outdated Dear Colleagues - not all of them are colleagues, some are external parties Dear (name of committee, etc.) Members - not all of them are members.
