Even though this paragraph is allegedly about the author, it's not actually about you . It's about your reader, and what that person is looking to learn or gain from your article. It helps to think of this setup as a well-composed sentence -- you're the object , and the reader is the subject. You've probably come across the occasional author bio that features a personal tidbit thrown in, like "cat lover" or "coffee addict." But when is that okay or smart -- or even more important, appropriate? Why Your About The Author Is So Important

scribemedia.com About the author demands the third person. While it may feel a bit weird to write "he" or "she" rather than "I" in the first person, there's one significant benefit: Your relevant accomplishments and accolades will sound far less boastful. Don't brag too much. Don't go overboard showing off because everyone knows you wrote it. Keep your author bio short. The faster they can read about you, the faster they can buy your book. Aim for 60-90 words and don't go above 150.
