She has also worked in the industry as a Technical Design Manager for large corporations such as May Department Stores and Federated Department Stores. Paula has a Masters of Arts Degree in Fashion Merchandising. No customer reviews. Suggestions for Content: - PLUS size grading for women - only has grading charts up to size 18. Need to have to at least size 24 for today's current market. - LINGERIE / UNDERGARMENTS- there are instructions for measuring swimwear/knits but would love to see more details on bras and underwear, especially terminology & grading charts for underwire bras, underwear, lingerie, etc. Suggestions for Book Quality: I purchased the "paperback" but it came spiral bound. See Complete Table of Contents. Product description. Review. This book proved to be invaluable. It is clear and accurate and contains very precise flats that are extremely useful in aiding students to understand the importance and requirements of accurate working drawings. - -Kevin Freeman, Norwich University of the Arts, UK. It is a specific and detailed resource on how to measure and record data for apparel products. - -Sheryl Farnan, Metropolitan Community College, US. This is by far the best spec book that is currently published. Tricia Edwards, Fashion Institute of Design and Merchandising (FIDM), US This is a great book if you are teaching students how to develop a technical package. It has very detailed information about what goes on each sheet. I like the author's approach. Last edited by Open Library Bot. December 5, 2010 | History.
