## Description:

**From Publishers Weekly** Tannen probes the way gender roles shape the ways men and women communicate in the workplace, and how these differences lead to misunderstandings.

**From Library Journal** Tannen (*You Just Don't Understand*, Morrow, 1990) describes differences in men's and women's public communication as found within the business setting. These differences appear to influence actual perceptions of worker skills and abilities. For example, women say "I'm sorry" without actually apologizing and tend to use an indirect manner of speech. These styles make women appear less confident,

competent, and professional. However, women who learn to speak like men are accused of being aggressive and unfeminine. Written for the general reader, Tannen's work is entertaining and filled with illustrative conversations. It raises many issues of concern to working women, from knocking against the glass ceiling to dealing with sexual harassment. Unfortunately, Tannen's research has not yet suggested any linguistic solutions. Highly recommended for general public and academic libraries.

TALKING FROM 9 TO 5 Women and Men at Work. A new york times business bestseller. This groundbreaking book does for the workplace what Tannen's international bestseller You Just Don't Understand did for private conversations. It shows how women's and men's ways of speaking affect who gets heard, who gets credit, who gets ahead, and what gets done in the workplace. Why are women often seen as less confident and competent than they really are? Why are men often labeled arrogant? Why do so many women find that they say something at a meeting only to have it ignored, then a man says the same thing An instant classic, Talking From 9 to 5 brilliantly explains women's and men's conversational rituals and the language barriers we unintentionally erect in the business world. It is a unique and invaluable guide to recognizing the verbal power games and miscommunications that cause good work to be underappreciated or go unnoticed an essential tool for promoting more positive and productive professional relationships among men and women. ...more. You might, as I did, start listening to conversations at work in a different way, almost as a linguist would. As a working woman, reading this book gave me an advantage. After reading it, I find myself using a different communication style now with males at work than I do with females at work. At least now I am aware of how the "female" communication style I naturally use is probably being heard by my male superiors. Likewise, as a boss I've put this book, along with "Who Moved My Cheese?", on the reading list for new hires.Â In this fascinating book, Deborah Tannen explores how mismatched conversational styles affect women and men in the workplace. I highly recommend it for writers, as well as anyone who works with other people. Reading it explains so much about my own conversational styles. Read more. Chapter One: Women and Men Talking on the Job. Chapter Two: "Sorry, I'm Not Apologizing": Conversational Rituals. Chapter Three: "Why Don't You Say What You Mean?" I also spent time shadowing the individuals, to become familiar with the settings they worked in and who was who, and to get my own impressions of the situation and the people. Later, I had the taped conversations transcribed, and then I examined the transcripts and listened to the tapes. Finally, at all these companies, and in other companies and contexts, I talked at length to individuals and in many cases tape-recorded our conversations. In a sense, these were interviews, but I did not go in with a list of questions.

Talking from 9 to 5. Last Updated on May 6, 2015, by eNotes Editorial. Word Count: 273. Her second work, YOU JUST DON'T UNDERSTAND, narrowed the focus to the manner whereby conversational styles are influenced by gender. TALKING FROM 9 TO 5 incorporates the results of Tannen's earlier investigation and applies those insights to private speaking in a public context—what is said at work. Download Talking from 9 to 5 Study Guide. Tannen insists that women in positions of authority, and those who wish to achieve that status, face a special challenge in that their conversational style works to deny them the advancement or respect they desire. Unfortunately, the workplace as it is currently perceived places most women, and a few men, at an unnecessary disadvantage.
