The Association of Lunar and Planetary Observers (ALPO or A.L.P.O.) is an international scientific and educational organization established in March 1947 in the United States by Walter H. Haas, and later incorporated in 1990. ALPO is an organization for advancing and conducting astronomical work by both professional and amateur astronomers who share an interest in solar system observations. It is currently headquartered in Springfield, Illinois. (The Strolling Astronomer). The following indexes are provided as a service to ALPO members, researchers and interested others whose search brings them to the Assn of Lunar & Planetary Observers. This being an ongoing project, additional indexes to previous volumes of the Journal will be added to this page as they become available.
