

## World Textiles: A Concise History

By Mary Schoeser

Thames & Hudson Ltd. Paperback. Book Condition: new. BRAND NEW, World Textiles: A Concise History, Mary Schoeser, The history of textiles, more than that of any other artefact, is the history of human ingenuity. From the very earliest needles of 25,000 years ago, to the "techno textiles" used in Space Shuttle parachutes, they have been fundamental to human existence and achievement, and - as this book demonstrates - have informed developments in many other areas from agriculture to metallurgy. Textiles are truly global commodities, common to every culture and for a long time the motivation for trade, the exchange of ideas and sometimes even conflict, between these cultures. Silks from China, carpets from Persia, ikats from Indonesia, cottons from India, fine linens from Flanders - each one of these transactions has helped to shape the modern world. Written as a chronological survey spanning prehistory to the early 21st century, this book is organized around five themes - materials, methods, trade, technology and social structures - which allow textiles from all ages to be investigated from many angles: how they are made, what they are made from, how they function in society, the ways in which they are valued and given...

Textiles are global commodities, common to every culture and for a long time the motivation for trade, the exchange of ideas, and sometimes even conflict. Silks from China, carpets from Persia, ikats from Indonesia, cottons from India, fine linens from Flanders--each of these has helped to shape the modern world. This groundbreaking book surveys, from prehistory to the early twenty-first century, how textiles are made, what they are made from, how they function in society, the ways in which they are valued and given meaning, and the messages they contain. The history of textiles, more than that of any other artefact, is the history of human ingenuity. From the very earliest needles of 25,000 years ago, to the "techno textiles" used in Space Shuttle parachutes, they have been fundamental to human existence and achievement, and - as this book demonstrates - have informed developments in many other areas from agriculture to metallurgy. Textiles are truly global commodities, common to every culture and for a long time the motivation for trade, the exchange of ideas and sometimes even conflict, between these cultures.

From the earliest needles of 25,000 years ago to techno textiles used in Space Shuttle parachutes today, textiles have been fundamental to human existence and achievements, and have informed developments in other areas from agriculture to metallurgy. I think this book would be in the library of anyone who collects or designs textiles. Even without the color photos of each type of textile, the information on technique and history would mark it as an frequently used reference. World Textiles. Second, Semper challenged aesthetic norms by developing his alternative history into a new theory of style. His ideas destabilized the discipline and catalyzed an ideological shift fully described by August Schmarsow (Mallgrave, 1996). Finally, a century later, Kenneth Frampton put forth a tectonic theory in an effort to help architects achieve ideological goals through constructive practice (Frampton, 1995). The history of clothing starts in the Stone Age, with leather and fur. By the Bronze Age women were spinning and weaving wool and linen, hemp and silk. In the Iron Age, they started to sew and embroider. The Middle Ages brought knitting and the spinning wheel, and then machines made clothing much cheaper. Instead of enslaved prisoners, now the rich people hired free women and children to work in textile factories, but for very low wages. They forced people in India to grow cotton to spin in their factories. History of clothing: Enslaved African-Americans picking cotton. World Textiles: A Concise History, by Mary Schoeser (2003).
