The scientific journal Journal of Chemical Education is included in the Scopus database. Based on 2020, SJR is 0.473. Publisher country is United States of America. The main subject areas of published articles are Chemistry(all), Education. We offer making basic requirements to academic papers compliance test using "Paper quality checking" service. Paper quality checking service is in demand among researchers who wish to make final improvements to their work before submitting it to the target journal. The experienced editors of ORES, who have published papers in cited journals, with the participation of foreign partners go through finished articles. The journal for teachers, researchers and other practitioners in chemistry education. CERP is free to access thanks to sponsorship by the Royal Society of Chemistry's Education Division. The Journal of Chemical Education is a monthly peer-reviewed academic journal available in both print and electronic versions. It is published by the Division of Chemical Education of the American Chemical Society and was established in 1924 by Neil Gordon. The journal covers research on chemical education, and its target audience includes instructors of chemistry from middle school through graduate school and some scientists in commerce, industry, and government. Journal of Laboratory Chemical Education is an open-access, peer-reviewed journal describing the furthering of chemical education via effective laboratory experiences. Educational laboratory experiences at the high school and undergraduate level provide a critical component of a high quality, practical education in chemistry. Laboratory chemical education is broadly defined as laboratory experiences in all traditional areas of chemistry including but not limited to organic chemistry, physical chemistry, analytical chemistry, inorganic chemistry, biochemistry, electrochemistry, polymer chemistry, forensic chemistry, medicinal chemistry, environmental chemistry, and computational chemistry.
